7. Annual Investment Policy Review

Question arose regarding how the investment policies are upheld with respect to the frequency of reporting to the Board of Governors, specifically the social responsible investing (SRI) criteria, and whether or not there should be a stronger connection between the investment practices of the University and the Mission Committee.

As a result of the Board’s discussion, considerations to be included in the additional review of the University’s investment policies and standards were identified. These considerations include review of: the portfolio reporting cycle, frequency, and visibility of information provided to the Board of Governors, oversight of the application of investment restrictions, investment decision making framework, and inclusion of gender neutral language within the policy.

The Finance and Audit Committees will undertake a further review of the University’s Investment Policies and management strategy, and will report back to the Board.

**Motion:** To affirm an annual assessment of the Board of Governors’ Investment Policies, as presented, was conducted, and to approve that the Investment Policies remain in effect.

10. Risk Management Policy

As the University’s Risk Management Policy approached its cyclical review period, updates to the policy were identified to enhance the clarity of the University’s risk management framework, including oversight roles and responsibilities. In addition, a Statement of Institutional Risk Tolerance was modified to align with the updated policy. The Statement is a set of principles related to the University’s tolerance for risk.

The University of Waterloo’s Risk Management Policy and Program were reviewed and utilized as guiding tools to confirm the University’s alignment with risk management practices and standards applied by the University of Waterloo.

The Board discussed the oversight responsibilities of the risk management program and considered the need for a risk assessment at the Board level to outline risks encountered by the Board.

**Motion:** To approve the Risk Management Policy, as presented.

**Moved:** T. McKechnie, **Seconded:** M. Wendland, **Carried.**

Questions of the risk tolerance levels established were considered to confirm how the tolerance level of different category would impact the University. Specifically, the Board discussed whether the moderate tolerance level established for Financial Risks was aligned with the conservative nature of the University’s financial position. The Finance and Audit Committees will review this
tolerance level to assess the impact of risk tolerance on cashflow projections and capital fund planning.

**Motion:** To approve the 2019 Statement of Institutional Risk Tolerance, as presented,
